EDUCATION

Rajshahi University of Engineering & Technology B.Sc. in Electronics & Telecommunication Engineering CGPA: 3.47/4.00 (Completed 7 out of 8 semesters) Best SGPA: 3.83/4.00 (6th semester)	2022 - Present
---	----------------

EXPERIENCE

Redbubble Independent Artist/Graphic designer	August 2020 - Present
---	-----------------------

- Create and design unique merchandise on a global print-on-demand marketplace.
- Shop link: www.redbubble.com/people/taylor-shreya/shop

BrainStation-23 Software Attachment (Data Scrapping and Web Development)	March 2025
--	------------

- Completed a two-week software-based attachment focused on web scraping and backend development. Developed a fully functional web data scraper using BeautifulSoup, Selenium, HTML, CSS and Flask to extract and display dynamic web content in a user-friendly interface.
- Project repository: github.com/SarafAnzumShreya/Scraper

PUBLICATIONS

A Hybrid Approach for Accurate Brain Tumor Detection Using Deep Learning Techniques 1st author	2024 Conference Paper
--	--------------------------

- DOI: [10.1109/ICCIT64611.2024.11022592](https://doi.org/10.1109/ICCIT64611.2024.11022592)

Residual Block-Driven CNN for Accurate White Blood Cell Image Analysis and Classification 4th author	2024 Conference Paper
--	--------------------------

- DOI: [10.1109/ICCIT64611.2024.11021843](https://doi.org/10.1109/ICCIT64611.2024.11021843)

Women Empowerment and Governance through Digitization of NGO Management Systems 3rd author	2022 Conference Paper
--	--------------------------

- DOI: [10.1109/ICRPSET57982.2022.10188564](https://doi.org/10.1109/ICRPSET57982.2022.10188564)

PRE-PRINTS

DB-FGA-Net: Dual Backbone Frequency Gated Attention Network for Multi-Class Brain Tumor Classification with Grad-CAM Interpretability 1st author	2025 Pre-print (Undergraduate Thesis)
--	--

- DOI: [10.48550/arXiv.2510.20299](https://doi.org/10.48550/arXiv.2510.20299)

Real-Time Currency Detection and Voice Feedback for Visually Impaired Individuals 1st author	2025 Pre-print
--	-------------------

- DOI: [10.48550/arXiv.2510.20267](https://doi.org/10.48550/arXiv.2510.20267)

PROJECTS

EchoCash

December 2024 - February 2025

Skills: Python, HTML, CSS, JavaScript, Machine Learning, flask, Socket.IO

Machine Learning Project

- Provides real-time currency recognition with voice feedback, enhancing financial independence.
- Uses voice output to announce detected currency and count total amounts.
- Showcases the practical use of AI and assistive technology in addressing accessibility challenges.
- GitHub Repository: <https://github.com/SarafAnzumShreya/EchoCash>

Avatar Me

August 2024

Skills: HTML, CSS, JavaScript

Interactive Web Development Project

- Developed a web-based application that enables users to create customized avatars with various options for clothing, accessories, hairstyles, facial hair, and hijabs.
- Designed a diverse range of customization options, including multiple colors and styles, ensuring inclusivity for different races and genders.
- Project Link: [Avatar Me](#)

Welcome to RUET

July 2024

Skills: HTML, CSS, JavaScript

Web-Based Educational Game

- Developed an interactive web game that simulates a university course enrollment system, allowing users to select a department and register for courses.
- Designed a course selection mechanism where users can take up to 15 courses, with only relevant courses contributing to their CGPA.
- Implemented a grading system where users must achieve a minimum CGPA of 2.25 to receive a completion certificate.
- Project Link: [Welcome to RUET](#)

Reverse Vending Machine

August 2023 - December 2023

skills: Language - c, AtMega328p, ESP32cam

Electronics Project

- Bottle Recognition: The machine uses advanced technology, such as machine learning algorithms, to identify beverage container, primarily focusing on plastic bottles.
- Deposit Mechanism: The machine is equipped with a secure deposit area where users place their used beverage containers. This area ensures proper handling and containment.
- QR Code scanning & rewarding: Upon depositing plastic bottle, a QR code containing users account ID is scanned for providing reward. After scanning the QR code, a certain amount of credit with added to their account which can later be redeemed as usable currency.
- Bin Full Sensing: When the container or the bin is full, a message is shown alerting about the condition.
- GitHub Repository: <https://github.com/SarafAnzumShreya/RVM>

LICENSES & CERTIFICATIONS

Advanced Learning Algorithms

Jan 2025

DeepLearning.AI, Stanford University

- Credential ID: [6T7KI3YQGJN0](#)

Supervised Machine Learning: Regression and Classification

Nov 2024

DeepLearning.AI, Stanford University

- Credential ID: [Y9815S6QCI3W](#)

TECHNICAL STRENGTHS

Programming Languages	C, C++, Python, HTML, CSS, JavaScript
Machine Learning	TensorFlow, Keras, Scikit-learn, OpenCV, YOLO, CNN
Databases	MySQL
Tools	Canva, AutoCAD, MATLAB, Mathematica, Arduino, ESP32-CAM, Flask

AWARDS AND SCHOLARSHIPS

Technical Scholarship	2023-2026
Rajshahi University of Engineering & Technology	

EXTRA-CURRICULAR ACTIVITIES

Huawei Seeds For The Future 2025	2025
Finalist	

- Completed a comprehensive 40-hour program featuring expert-led instruction in cutting-edge technologies: 5G, Artificial intelligence, Cloud Computing and Digital Power.
- From initial 3500+ applicants only 21 was chosen for the final round after several evaluations such interviews, written exams, group evaluation, group presentation.
- Collaborated on a team-based tech business project, demonstrating skills in problem-solving and entrepreneurship.

Cognizant 2.0 Case Competition	2023
1st Runner-up	

- Competed in a case competition focused on identifying and mitigating fire hazards in Bangladesh's garment industry.
- Developed an innovative and data-driven solution, securing 1st runner-up position out of 57 participating teams.

Line Following Robot (LFR) Competition	2022
Participant	

- Designed and implemented an autonomous line-following robot for the 'ETechnovation-2022' event, organized by the Electronics and Telecommunication Department of RUET.
- Gained hands-on experience in embedded systems, robotics and sensor integration.

Volunteer, ETEchnovation	2022
---------------------------------	------

- Assisted in organizing and managing ETEchnovation, a departmental technical event at RUET.
- Contributed to event coordination, logistics and participant engagement, enhancing teamwork and organizational skills.

Competitive Programming	2022 - 2023
--------------------------------	-------------

- Participated in multiple competitive programming contests, improving algorithmic problem-solving and logical thinking.
- Collaborated in team-based competitions, strengthening teamwork and strategic coding abilities.

Social Media Community Management	2019 - 2021
--	-------------

- Built and managed multiple entertainment-focused social media communities across Instagram and X/Twitter.
- Grew several pages organically to over 10k–13k followers within a few months through content strategy, trend analysis and audience engagement.
- Created visual content and managed audience interaction, strengthening communication, digital marketing and online community management skills.
